## What this is

This memo reviews BSP's six portfolio companies using public records only. It shows where each company stands, where profit can grow fastest and what to do in the first 90 days. Figures not found in public filings are analyst estimates, marked est., to be checked against company actuals.

**Terms:** EBITDA is operating profit before interest, tax, depreciation and amortization. EV is enterprise value. A "turn" is one times EBITDA added to the sale price. DSO (days sales outstanding) is how long customers take to pay. Each OS (operating system) is a bundle of software and AI tools for one company. PP is Punctual Pros.

## 1 Purpose

Where each company stands, which levers move EBITDA fastest, and what the PRG should do in 90 days. Benchmark: Smith + Howard, ~4x revenue in 3.7 years, sold to TPG Growth.<sup>28</sup>

Rows from month 12 on are assumptions (est.). Month 36 is ~4.5x FY2025 revenue.

### AI AGENTS (11)

- 24/7 AI dispatcher: 70% booking versus ~42% for a typical call-center rep.
- AI estimator recovered \$1.2M of unsold estimates at a ~\$20M peer.
- Plus dispatch, renewal, review, AP/AR, permit and recruiting agents.

### TECHNICIANS AND FINANCING

- Technicians, not demand, are the constraint: turnover runs 16–21% a year.
- Hire from Thaddeus Stevens (97% placement) and PA apprenticeships.
- Fund with the PGIM delayed-draw line, seller rollover and co-invest.<sup>25</sup>

<sup>25</sup> Punctual Pros nationwide plan: 2026 FDDs; BLS; Thaddeus Stevens College; PA DLI; ServiceTitan, Rilla and XO case studies; GF Data H1 2025 and Q2 2026.

## 9 The OS program

Buyers pay for recurring, scalable earnings: PKF prices project-heavy HVAC firms at 5–6x and repeatable-service firms at 10x+. No source isolates a pure technology premium, so we claim ~0.5–2.5 turns. Each OS assembles proven vendors with a thin BSP data layer.<sup>7</sup>

| OS · company                     | Investment (est.)  | EBITDA impact (est.) | Multiple (est.) | Time to value | Evidence          |
|----------------------------------|--------------------|----------------------|-----------------|---------------|-------------------|
| <b>ServiceOS</b> · Punctual Pros | \$0.4–0.9M         | \$0.32–1.12M         | +1.0–2.5x       | 6–12 mo       | Strong            |

| <b>LabOS</b> · Thomas Scientific | \$2.0–4.0M         | \$1.25–4.8M          | +0.5–1.0x       | 9–18 mo       | Weak for multiple |
| <b>SignalOS</b> · BPI            | \$1.0–2.0M         | \$0.85–3.75M         | +0.5–2.0x       | 6–12 mo       | Medium            |
| <b>HarborOS</b> · Fair Harbor    | \$0.3–0.7M         | \$0.40–1.75M         | +0.2–0.5x rev.  | 4–9 mo        | Weak to medium    |
| <b>Total</b>                     | <b>\$6.0–12.4M</b> | <b>\$4.9–18.2M</b>   | —               | 4–18 mo       | Assumptions       |

**Agents.** 45 AI agents from 8 patterns, each with a named human approver; none moves money alone. Est. run-rate value ~\$12.7M a year, led by Thomas (\$3.8M) and Frontline (\$3.6M). Re-base on 8-week baselines before any exit case.<sup>26</sup> On PP's \$16M month-36 EBITDA, each turn is ~\$16M of EV.

<sup>26</sup> Portfolio AI-agent plan: 45 agents, rollout waves, controls, value summary (not de-duplicated).

## 10 Growth marketing (Punctual Pros first)

- Sell the brands' existing promises, such as One Hour's on-time guarantee.
- Google Local Services Ads (LSA) as the base: \$39–57 per lead, ~44% booked.
- ZIP-targeted connected TV (CTV), judged on cost per booked job and holdout lift.

### 8-WEEK CENTRAL PA PILOT (~\$95.5K)

| Week | Test                                      |
|------|-------------------------------------------|
| 1    | Call tracking; LSA clean-up; holdout zips |
| 2–3  | Two CTV spots; mail offer A/B             |
| 4–6  | First read; weather trigger on            |
| 7–8  | Holdout lift; go/no-go                    |

- New -mover mail to ~2,300 PA and ~1,150 NJ deed transfers a month.
  - National Weather Service (NWS) alerts raise budgets 12–36 hours before demand spikes.<sup>27</sup>
- Cost per booked job (est.): LSA ~\$117, search ~\$249, CTV ~\$416; target ~\$185–200.

<sup>27</sup> Punctual Pros ad plan: test plan, CTV pricing, SearchLight LSA benchmark.

## 11 Competitive landscape

- BSP is small: \$335M flagship versus \$0.9–2.1B at Trivest, Sterling, Gridiron.<sup>12,28</sup>
- Residential services is the hardest field; target shops consolidators skip.
- CET has open space: Kohlberg and Huron companies sit mostly outside New England.<sup>6</sup>
- No sponsor-backed rival copies Frontline's legal IT plus billing model.
- Calibre Scientific made 12+ lab deals in 2024, mostly in Europe.
- Exit demand is deep: LGP, Goldman Sachs and TPG keep buying services.<sup>12</sup>

## 12 First 90 days in the PRG

1. **Days 1–30** Replace estimates with actuals: one data request to the six CFOs.
2. **Days 1–45** Open a Thomas Scientific refinancing workstream and 13-week cash flow.
3. **Days 1–60** Run the CET + Horton 100-day plan with one bid desk.
4. **Days 15–75** Launch the PP voice agent and ads pilot; read at week 8.
5. **Days 1–90** Approach top PP and CET targets off-auction; aim for one signed letter of intent.
6. **Days 1–60** Close Frontline's client-count and churn gaps; size a co-invest top-up.
7. **Days 1–30** Put AI controls and KPI baselines in place before agents ship.
8. **Days 30–90** Pilot SignalOS retainers with three BPI corporate clients.
9. **Days 30–90** Reset Fair Harbor's open-to-buy and markdown rules before the next buy.
10. **Monthly** Hold a PRG operating review with an exit-readiness scorecard per company.

### CAVEATS

- Private-company financials are outside-in estimates (est.); no non-public information used.
- KPI roadmaps, OS and agent values are assumptions, not company guidance.
- The ~\$137M figure is BSP-FL LP (Frontline); the flagship reports \$335M.<sup>28</sup>
- CET, BPI and Fair Harbor debt is inferred; paywalled sources were not accessed.
- Vendor performance claims are self-reported. This memo is not investment advice.
