

PORTFOLIO RESOURCE GROUP MEMO

Broad Sky Operating Intelligence: what the data says and what we should do next

TO	Broad Sky Partners leadership and the Portfolio Resource Group	FROM	Syed Rahman
DATE	October 6, 2026	BASIS	30 of the portal's 56 datasets, 3,262 sourced records (public filings only)

1 Purpose

This memo turns the Operating Intelligence portal into one decision document. It answers three questions for the Portfolio Resource Group (PRG). Where does each company actually stand on the public record? Which levers move EBITDA and the exit multiple fastest? What should the PRG do in the next 90 days? The benchmark is our own first exit. Smith + Howard went from ~100 to ~800 professionals, 11 offices, nine add-ons and ~4x revenue in about 3.7 years and sold to TPG Growth in August 2026.²⁸ Revenue, EBITDA, leverage and value figures are outside-in estimates (est.) built from PPP loans, Form D and Form ADV filings, BDC schedules, franchise disclosure documents (FDDs) and peer ratios. Each should be replaced with company actuals in the first 30 days.

BOTTOM LINE

- The six companies total roughly **\$540–750M of revenue and \$66–101M of EBITDA** (est., sum of ranges below). Two are already past the Smith + Howard hold: Thomas Scientific at 4.7 years and Fair Harbor at 4.5.
- Thomas Scientific is the urgent item.** Lenders mark the first-lien loan at 88.3% of par, the sponsor common is marked at about zero and the loan matures in December 2027.¹⁹ It needs a cash-and-refinancing plan before a growth plan.
- The largest upside is in CET and Punctual Pros.** CET has open space in New England and a funded wastewater pipeline. Punctual Pros can buy tuck-ins at ~6–7x and assemble a company that sells in the 10x tier.²⁵
- The **OS program** (six operating systems and 45 AI agents) needs an est. \$6.0–12.4M of investment. For that, the evidence supports +0.5–2.5 turns of exit multiple per company, and the agents add ~\$12.7M a year of run-rate value (est.).^{7,26}

2 Portfolio snapshot

Company · entry	Revenue (est.)	EBITDA (est.)	Add-ons under BSP	Top opportunity	Next action
CET Feb 2025	\$65–100M pro forma	\$6–11M	2: NuWave (Oct 2025), Horton (Sep 2026)	62 funded or requested CT/MA/RI plant and pump-station projects for Horton ³	Horton 100-day integration; October Worcester/CT bid slate; RI/NH/ME/VT founder outreach
Punctual Pros Apr 2024	~\$22M \$16–28M	~\$2.6M \$1.8–3.1M	2: Horvath (Dec 2024) + 1 unidentified	Capture missed calls (~\$1.37M/yr est.); tuck-ins at 6–7x into a 10x-tier portfolio company	AI voice agent + 8-week \$50k/month ads pilot; proprietary approach to the top 3 targets
Frontline Dec 2024	\$100–140M	\$16–20M at close	0 (KL Software is a partnership)	143 mid-size firms (17,042 attorneys) plus legal-MSP and billing tuck-ins ¹⁷	Close the client-count and churn gaps; size a co-invest top-up; Tier-0 AI desk
Thomas Scientific Jan 2022	\$250–320M	\$25–35M	4: NCI, Quintana, Day, Arrowhead	Cash release: each day of DSO is worth ~\$0.8M; digital and private-label mix ²⁰	Refinancing workstream ahead of Dec 2027 maturity; LabOS cash agents first
BPI Apr 2023	\$85–125M net	\$17–28M	6: BOLDT, Seven Hills, Message House, Propper Daley, Agado, 365 Sherpas	Convert cyclical political billings into always-on retainers (SignalOS)	Pilot a SignalOS retainer with 3 clients before the post-midterm dip
Fair Harbor Mar 2022	\$20–35M pt. ~\$27M	\$0–4M	0	Wholesale doors ~250 → ~520; markdown and returns discipline	Open-to-buy reset for the next season; fit and returns agents; exit-option review

Sources: estimate tables in each company's public-filings research (notes 1, 8, 14, 19, 21, 23); add-ons from *Broad Sky firm profile*. All revenue and EBITDA figures are est., low confidence unless stated.

SOURCED NE OPPORTUNITIES

FINDINGS

- Horton is the transformational add-on.** Its 2020 PPP loan (\$646k, 42 jobs) has grown into a 120+ person business with est. \$25–40M of revenue. CET says the deal "nearly doubles" the workforce, putting the company at ~260–290 people.^{1,2}
- The mark is modest so far.** Broad Sky's March 2026 Form ADV carries the CET co-invest at \$8.504M against \$7.5M invested (1.13x gross). That fits NuWave plus organic growth, not a re-rating. No lender is disclosed anywhere, so leverage (3.5–5.5x est.) is inferred.¹
- Wastewater is the near-term pipeline.** We scored 183 CT/MA/RI treatment plants. New Haven East Shore leads with an \$82M upgrade on Connecticut's FY27 fundable list, followed by Hartford (\$24.3M) and Norwalk (\$26M). The October bid slate includes the Massport Worcester RFQ (due 10/8) and Glastonbury WPCF (10/6).³
- Demand is funded, but not by data centers.** The EPA puts U.S. clean-water need at \$630.1B over 20 years, and Mass Save's 2025–27 plan is \$4.5B. ISO-NE, however, says New England's data-center growth has lagged other regions. Data-center electrical is a PJM story (~30 GW by 2030).⁴
- Buyers are getting selective.** Electrical-contractor M&A fell from 140 deals in 2024 to 99 in 2025, and about two-thirds of buyers have been financial since 2020. Kohlberg's and Huron's portfolio companies sit mostly outside New England.^{5,12}

TOP ADD-ON TARGETS (48-COMPANY SCREEN, MEDIAN REVENUE ~\$15.1M)

McDonald Electrical (MA, fit 83), K.M. Kelly (MA, 83), Energy Electric (MA, 81), Coghlin Electrical (MA, 79), FM Generator (MA, 78), CTEC Solar (CT, 75).⁶

36-MONTH PATH (ASSUMPTION)

Revenue ~\$80M → \$240M and EBITDA \$8M → \$30M through RI/NH/ME/VT add-ons and ~25% recurring service mix. A Phase 4 move into Upstate NY, NJ or eastern PA is a gated option, explicitly outside New York City.

GRIDOS Turn one-off bids into recurring revenue: bid-radar triage, faster takeoff, and SCADA, pump-station and solar O&M monitoring on Procore, with a thin portal data layer. **Est. \$0.8–1.8M to build, +1.0–2.5 pts margin (\$0.62–2.62M EBITDA) and +0.5–1.5 turns, with value in 9–15 months.**⁷

Punctual Pros Lancaster PA · Horvath (Jersey Shore NJ) · One Hour / Ben Franklin / Mister Sparky franchisee

25

TERRITORIES (19 PA + 6 NJ)

8.73%

LOAN COUPON (S+500)

~2,300

PA NEW MOVERS / MONTH

FINDINGS

- Density is above the system average.** Our blended FDD and payroll estimate puts revenue at ~\$0.9M per territory against system averages of \$0.61M (One Hour) and \$0.66M (Ben Franklin). Royalty and brand fund take ~7.2–7.5% of revenue, which caps margin at ~8–14% (est.).⁸
- The debt is visible.** PGIM Private Credit Fund's June 30, 2026 10-Q shows a \$4.83M first-lien slice at SOFR+500 (8.73%), due March 26, 2029, plus a \$1.4M unfunded delayed-draw line. That is an acquisition facility already in place. Total senior debt is est. at \$10–18M.⁹
- Missed calls are the cheapest revenue.** Only 52% of home-services callers reach a person (Invoca 2026). Our model puts ~14.8% of PP's ~3,502 monthly calls as missed. A 24/7 AI voice agent recovers ~\$1.37M a year of revenue (est.).¹⁰
- The base is old and turning over.** There are 248 core PA zips with ~1.0M housing units, 57.8% of them older stock. New movers run at ~2,300 a month in PA and ~1,150 on the Jersey Shore, and each household must pick a provider within months.¹¹
- This is the most crowded field we track.** Sila (Goldman Sachs), Legacy/HL Bowman (Gridiron) and Ally (Watchtower) are buying inside PP's counties. We should win founders off-auction rather than join auctions.¹²

TOP ADD-ON TARGETS (61-COMPANY SCREEN)

Lancaster Plumbing, Heating, Cooling & Electrical (fit 84, 5 miles from HQ); West Chester tri-brand Authority territories (82); C&C Air (NJ, 82); Zimmerman (80); PHE / South Jersey tri-brand (80).¹³

WHY IT MATTERS

A sub-\$25M-TEV tuck-in averages 6.3–6.9x EBITDA, while a \$100–250M-TEV portfolio company prices at ~10.0x (GF Data). Every tuck-in that integrates cleanly creates value before synergies (section 5).²⁵

SERVICEOS ServiceTitan as the system of record, plus AI voice, dispatch, pricebook and membership agents. HVAC booking rates average 38%, versus 59% at shops with 25+ technicians. **Est. \$0.4–0.9M to build, +2–4 pts margin (\$0.32–1.12M) and +1.0–2.5 turns. This is the strongest evidence of the six.**⁷

12–15x
ENTRY EV/EBITDA EST.

\$90M
NXT/AUDAX TERM LOAN

+~10%
CARLYLE MARK VS COST

FINDINGS

- The premium is already paid.** Equity of \$136.95M (BSP-FL LP Form D) plus \$12.5M from Carlyle AlInvest and a \$90M term loan implies an EV of est. \$230–260M, about 12–15x. EBITDA growth has to carry the return.¹⁴
- Early marks are positive.** Carlyle AlInvest carries its stake at \$13.72M against \$12.5M cost (June 30, 2026). Tim Britt, the founder of the Synoptek roll-up, became CEO in January 2026.^{14,15}
- Client-side AI is creating billing pain we can sell into.** E-billing rejections rose from 11% to 18% (Elite 2026). Meanwhile, 68% of firms have Copilot but only 8% have deployed it firm-wide (ILTA 2025).¹⁶
- The mid-market is open.** We screened 143 independent firms with 40–350 attorneys (17,042 attorneys) across 16 metros. Of these, 37 score 65+, and big legal MSPs under-serve the segment.¹⁷
- Funding is the binding constraint.** Incremental debt at sector-norm leverage covers ~\$15–35M, against a \$50–80M add-on plan (est.). Public disclosures put the client count anywhere from 300 to 900+, and that gap should be closed first.¹⁴

TOP ADD-ON TARGETS

LEVERAGE EST.

88.3%
LOAN MARK (MFIC, Q2-26)

Dec 2027
UNITRANCHE MATURITY

FINDINGS

- This is Fund I's largest bet.** BSP-TS, LP raised \$236.1M of equity at the December 2021 close and \$257.1M by January 2024, about \$108M of it from co-invest vehicles.¹⁹
- The equity is impaired.** Barings' \$5M co-invest stake is marked at \$6.9K, and MFIC carries its BSP-TS common at \$0. The loan has been through a PIK amendment (Q4 2024) and a mark-down to 88.3% of par, with ~15 months left to maturity.¹⁹
- The COVID cliff explains it.** Federal revenue fell from \$84–91M a year to \$7–8.5M. EBITDA is est. at \$25–35M against \$40–55M at entry.¹⁹
- The demand map already exists.** We scored 27,503 lab, pathology and hospital sites: 713 rated Pursue and 2,317 Nurture. About 30 inside-sales books, run on Grainger's academy model, would cover all of them.²⁰
- Digital is table stakes.** Avantor runs ~80% of transactions online, and Grainger's digital channels grow ~15.6% against ~2% for rep-led sales. Each day of DSO is worth ~\$0.8M of cash.^{7,20}

ADD-ON TARGETS (ONLY ONCE FUNDED)

Midland Scientific (fit 92), Capitol Scientific (91), MIDSCI (91), Valutek (91), Mandel Scientific (86). Calibre Scientific (StoneCalibre) is the main rival bidder.¹⁸

36-MONTH PATH (ASSUMPTION)

EBITDA ~\$30M → ~\$42.5M brings leverage near ~6x, inside the 5.25–6.25x unitranche band. That is the bar for an amend-and-extend, a recap or a sale.²⁰

LABOS An EBITDA-and-cash program, not a multiple story. It covers punchout and e-commerce, AI quoting and order entry, collections, demand forecasting and account health. **Est. \$2–4M to build, +0.5–1.5 pts (\$1.25–4.8M EBITDA) in 9–18 months. The evidence for a multiple premium is weak (+0.5–1.0 turns).**⁷

4 Bully Pulpit International and Fair Harbor

BPI DC / NYC / SF / Chicago / Europe · 6 add-ons • A levered buy-and-build. Broad Sky put in \$90.0M of equity (Form D, Apr 2023). PineBridge is agent on a credit agreement amended on October 29, 2024, the day the UK deals closed.²¹ • Scale. Est. ~375–425 people, \$85–125M of net revenue and \$17–28M of EBITDA. Six add-ons is ~2.0 a year, against Smith + Howard's 2.4.^{21,22} • Cyclicalities in the value gap. FEC federal political billings were \$3.1M in 2022 and \$115.3M in 2024. The PPHC IPO sets a ~8.4x EV/EBITDA floor.²¹ • Plan. Use SignalOS (narrative monitoring and message testing) to sell always-on retainers. Build named practices in AI and tech policy, energy and health. Add 2–3 specialist tuck-ins a year under the existing facility. The 36-month assumption is ~55% recurring revenue and \$38M of EBITDA.²² SIGNALOS Est. \$1–2M; +1–3 pts (\$0.85–3.75M); +0.5–2.0 turns.⁷	Fair Harbor NYC · sustainable beachwear, DTC + wholesale · 0 add-ons • An equity-only deal. Broad Sky invested \$30.73M of primary equity (Form D, Mar 2022). We found no term loan; any debt is likely an ABL under \$10M.²³ • Still small after 4.5 years. 2025 revenue is est. \$20–35M (point ~\$27M) and EBITDA est. \$0–4M. Web traffic is ~20% of Chubbies'.²³ • Margin pressure is visible. 38.5% of live variants were marked down in September 2026, and women's was cleared at ~70% off. On the other hand, 64.0% of the 372 live products are non-swim.^{23,24} • Plan. Fix the base first through markdowns, fit and returns. Then grow specialty doors from ~250 to ~520 with commissioned reps rather than new stores. Chubbies takes 51.9% of sales from wholesale and retail. The 36-month assumption is ~\$40M of revenue and ~\$5.2M of EBITDA.²⁴ HARBOROS Est. \$0.3–0.7M; +2–5 pts (\$0.4–1.75M); +0.2–0.5x EV/revenue.⁷

5 Punctual Pros nationwide plan

Punctual Pros starts from a base much like Smith + Howard's: ~\$22M of est. revenue, 25 Authority Brands territories and one out-of-state add-on. The plan repeats the Horvath deal along I–81 and I–95. The end state is the national consolidator *inside* the One Hour / Ben Franklin / Mister Sparky system, which has 1,066 outlets and \$831M of reported revenue; Punctual Pros holds ~2.3% of it today.²⁵

Phase (months)	Move	Revenue	EBITDA	Techs	Territories	Members
Today	Run-rate est. (FY25 ~\$22M grown ~8%)	\$24M	\$2.9M	85	25	6,500
1 (0–12)	Densify the core and the 261 adjacent zips in the opportunity score's Tier 1 (176 PA, 85 MD); 1–2 tuck-ins	\$38M	\$5.3M	135	32	11,000
2 (9–24)	Repeat Horvath across PA/NJ/MD/DE/southern NY; 54 Authority territories not yet owned	\$65M	\$9.8M	230	44	20,000
3 (18–36)	Mid-Atlantic portfolio company (Baltimore–DC, Richmond, Philadelphia suburbs, Pittsburgh); Phase 4 (36–60) then consolidates inside the system	\$100M	\$16M	350	58	32,000

All rows from month 12 on are analyst assumptions (est.), not guidance. Month 36 is ~4.5x FY2025 revenue, comparable to Smith + Howard's ~4x. Territories follow the plan's path of 25, 32, 44 and 58, capped at what Phases 1–3 can buy or convert, so revenue per territory rises from ~\$0.96M to ~\$1.7M (est.).

AI AGENTS (11) • 24/7 AI dispatcher. ServiceTitan reports 70% booking (90% with open capacity) against ~42% for a typical human CSR. Missed-call text-back covers the rest, since only 52% of callers reach a person. • AI estimator. It recovered \$1.2M of unsold estimates at a ~\$20M peer. Rilla coaching lifted a Mister Sparky's ticket 25%, and XOi cut second truck rolls 58%. • AI dispatch (Dispatch Pro users saw +14% ticket), plus membership-renewal, review, AP/AR, permit (~250 PA municipalities) and recruiting agents.	PRO PROGRAMS (11) AND FINANCING • Technician capacity is the constraint, not demand. BLS projects ~155k HVAC, plumbing and electrical openings a year, and annual technician turnover runs 16–21%. • Talent pipeline. Thaddeus Stevens College reports 97% placement and 18 job offers per graduate. Add PA earn-while-you-learn apprenticeships (15,965 active), pay ladders, tool stipends, AI copilots and veteran hiring. • Funding. The PGIM delayed-draw line, 20–35% seller rollover, Fund I follow-ons and a co-invest SPV for anchor deals. Q2 2026 total leverage is ~2.9x (GF Data).²⁵
---	---

²⁵ Punctual Pros nationwide plan: 2026 FDDs (system totals); BLS Occupational Outlook; Thaddeus Stevens College; PA DLI; ServiceTitan, Rilla and XOi customer stories; GHJ (rollover); GF Data H1 2025 and Q2 2026; also used in the portal assistant's nationwide answers.

6 The OS program and the tech-enabled multiple case

The case. Buyers pay for predictable, recurring and scalable earnings. PKF prices project-heavy, low-retention HVAC firms at 5–6x and repeatable-service firms with in-house capabilities at 10x+. Capstone/IMAP expect a ~3.0-turn spread between typical (6.8x) and premium (9.8x) middle-market deals. Scaled membership businesses print higher still: Champions ~18.5x, Sila ~17x. **No source isolates a pure "technology premium"; the observed premiums bundle scale, recurring mix, margin and growth.** Tech enablement can credibly claim ~0.5–2.5 turns. Each OS assembles proven vendors (ServiceTitan, Procore, ConnectWise/Kaseya, Shopify/Klaviyo) with a thin Broad Sky data layer, not custom software.⁷

OS · portfolio company	Investment (est.)	EBITDA impact (est.)	Multiple effect (est.)	Time to value	Evidence strength
ServiceOS · Punctual Pros	\$0.4–0.9M	+2–4 pts · \$0.32–1.12M	+1.0–2.5x	6–12 mo	Strong on direction, medium on size
GridOS · CET	\$0.8–1.8M	+1.0–2.5 pts · \$0.62–2.62M	+0.5–1.5x	9–15 mo	Medium
FirmOS · Frontline	\$1.5–3.0M	+1.5–3.0 pts · \$1.5–4.2M	+0.5–1.5x	6–12 mo	Medium (defends a 12–15x entry)
LabOS · Thomas Scientific	\$2.0–4.0M	+0.5–1.5 pts · \$1.25–4.8M	+0.5–1.0x	9–18 mo	Weak for multiple, medium for EBITDA
SignalOS · BPI	\$1.0–2.0M	+1–3 pts · \$0.85–3.75M	+0.5–2.0x	6–12 mo	Medium
HarborOS · Fair Harbor	\$0.3–0.7M	+2–5 pts · \$0.40–1.75M	+0.2–0.5x rev.	4–9 mo	Weak to medium
Program total	\$6.0–12.4M	\$4.9–18.2M	—	4–18 mo	All ranges are labelled assumptions

Agentic layer. 45 AI agents are built from 8 reusable patterns. Each agent is triggered by an event (an unanswered call, an NWS alert, a deed, a bid posting, an invoice), and each names a human approver; no agent moves money or posts publicly on its own. The est. run-rate value is ~\$12.7M a year: Thomas \$3.8M, Frontline \$3.6M, BPI \$2.3M, CET \$1.3M, PP \$0.9M and Fair Harbor \$0.8M. The rollout runs in four waves over 18 months, starting with inbound-contact and document agents. Each value has to be re-based on an 8-week company baseline before it enters an exit narrative.²⁶ **Illustration:** on PP's month-36 assumption of \$16M EBITDA, each turn of multiple is worth ~\$16M of EV, so the ServiceOS range is worth ~\$16–40M (est.).

²⁶ Portfolio AI-agent plan: 45 agents, rollout waves, governance controls 1–8, value summary (not de-duplicated).

7 Growth marketing and connected-TV program (Punctual Pros first)

- **Sell the promise the brands already own**, such as One Hour's on-time guarantee and Mister Sparky's "On-Time Electrician", rather than inventing new claims.
- **Make Google Local Services Ads the always-on base.** They cost \$39–57 per lead at a ~44% book rate (SearchLight, Feb 2026), and they are managed through reviews and answer speed rather than bids.
- **Self-serve connected TV (CTV)** now has \$50–500 minimums and ~\$15–40 CPMs with zip targeting, so we can buy TV in the 248 core zips without paying for the whole Harrisburg or Philadelphia market. It is judged on cost per booked job and geo-holdout lift, not completion rate.
- **New-mover mail** targets ~2,300 PA and ~1,150 NJ deed transfers a month. One in three PA buyers bought a pre-1980 home, which points to the older-home offers.
- **Weather triggers.** NWS alerts raise budgets and swap creative 12–36 hours before demand spikes.²⁷

8-WEEK CENTRAL PA PILOT (~\$95.5K)

Week	Test
1	Call tracking in ServiceTitan; LSA clean-up; 15% of Tier-I zips and 10% of new movers held out
2–3	CTV "Storm Ready" vs "We Watch the Clock"; mail offer A/B; <60-second text reply
4–6	First read; NWS trigger on in alternating counties; Vibe vs Disney Campaign Manager
7–8	Membership vertical; geo-holdout lift; go/no-go

Modelled cost per booked job (est.): LSA ~\$117, search ~\$249, CTV ~\$416; blended target ~\$185–200. If the pilot beats target, scale to the Jersey Shore and then the Mid-Atlantic. The same engine becomes a documented, attributed customer-acquisition asset for the exit.

²⁷ Punctual Pros ad plan: strategy summary, test plan, CTV platform pricing, SearchLight LSA benchmark; rendered spots in the briefing ad reel.

8 Competitive landscape

- **Broad Sky is small on this map.** The flagship fund reports \$335M sold (Form D), against \$0.9–2.1B flagships at Trivest, Sterling and Gridiron. We win on co-invest and operating credibility, and Smith + Howard is the proof point for Fund II.^{12,28}
- **Residential services is the hardest field.** National consolidators set add-on pricing, and Sila, Legacy/HL Bowman, Ally and Northwinds are buying in or next to PP's counties. We should lean on the franchise-system angle and sub-\$3M-EBITDA shops that large consolidators skip.
- **CET has open space.** Kohlberg's (RESA Power, Loenbro, CLEAResult) and Huron's (Criticore, Albireo) portfolio companies are mostly outside New England. Watch Albireo's Upstate NY push and PEC of Connecticut's \$61.1M Alaris deal (2025).⁶
- **No sponsor-backed company copies Frontline's legal IT + billing model.** The likely challengers are Alpine's Evergreen, EagleTree/Integreon and BV. Lock in law-firm MSP and billing add-ons before a generalist MSP builds a legal vertical.
- **Thomas Scientific faces one aggressive consolidator.** Calibre Scientific (StoneCalibre) made 12+ lab distribution deals in 2024, mostly in Europe, which leaves U.S. line-card targets open.
- **Exit demand is deep.** Shamrock bought Penta in 2025, so mid-market public affairs is uncrowded for BPI. Upmarket buyers (LGP, Goldman Sachs, Court Square, New Mountain, Bain, TPG) keep paying for scaled services companies. Coverage of apparel sponsors for Fair Harbor is incomplete.¹²

9 What I would do in my first 90 days in the PRG

1. **Days 1–30 Replace estimates with actuals.** Send one data request to the six CFOs (monthly P&L, debt schedule, KPIs) and re-base every portal view and every number in this memo.
2. **Days 1–45 Open a Thomas Scientific refinancing workstream.** Build a 13-week cash flow, start the DSO and collections agents, and engage lenders 14+ months before the December 2027 maturity, with options for an amend-and-extend, a recap or a sale.
3. **Days 1–60 Run the CET + Horton 100-day plan.** Set up one bid desk, put Horton on the CT wastewater slate (New Haven, Hartford, Norwalk) and arrange engineer-of-record meetings for the funded pump-station programs.
4. **Days 15–75 Launch the Punctual Pros revenue pilots.** Go live with the AI voice agent and missed-call text-back (Wave 1), and run the 8-week \$50k/month ads pilot with holdouts. Read the results at week 8.

5. **Days 1–90** **Run proprietary M&A outreach.** Approach Lancaster Plumbing, the West Chester tri-brand and Central Penn for PP, and McDonald, K.M. Kelly and Energy Electric for CET. Aim for one LOI by day 90 and avoid auctions.
6. **Days 1–60** **Close the Frontline diligence gaps** on client count, churn, recurring mix and the revolver or delayed-draw line. Size the co-invest top-up against the \$50–80M add-on plan, and pilot the Tier-0 AI desk.
7. **Days 1–30** **Put AI governance in place before agents ship.** Live controls 1–5, 8-week KPI baselines, one agent engineer and a named owner at each company.
8. **Days 30–90** **Pilot a BPI SignalOS retainer** with three corporate clients to offset the post-midterm advocacy dip, and stand up a federal capture team for ~\$250M of tracked recompetes.
9. **Days 30–90** **Reset Fair Harbor's open-to-buy and markdown rules** before the next season's buy. Launch the commissioned-rep door program and frame the exit options for the board.
10. **Monthly** **Hold a PRG operating review on the portal** with a Smith + Howard-style exit-readiness scorecard for each company (hold length, add-on cadence, recurring mix, OS adoption) to feed the Fund II narrative.

10 Appendix: data provenance and caveats

Dataset group	Files (records)	Primary sources	Confidence
Filings and estimates (Sep 24, 2026)	CET (25), Punctual Pros (29), Frontline (21), Thomas Scientific (31), BPI (21), Fair Harbor (25), competitor filings (51), public comparables (31)	SEC Form D/ADV, BDC 10-Q/N-PORT, PPP/USASpending, FDDs, Companies House, FEC, peer XBRL	High for filed facts; low for derived revenue, EBITDA and EV
Growth plans (Oct 6, 2026)	CET (46), Frontline (49), Thomas Scientific (43), BPI (53), Fair Harbor (46), Punctual Pros nationwide (59)	Filings above plus market evidence (EPA, BLS, ISO-NE, Elite, ILTA, GF Data)	KPI roadmaps are assumptions
Add-on screens	CET (48), Punctual Pros (61), Frontline and Thomas Scientific (48)	ZoomInfo parameters, company sites, press	Fit scores are analyst-defined
Demand and pipeline	CET opportunity radar (86), CET wastewater-plant targets (183), mid-size law firms (143), Punctual Pros market profile (177), Punctual Pros storm events (1,575), Punctual Pros demand model (54)	State procurement portals, CT CWF lists, ACS, NOAA, NWS, deed records	Medium to high
Programs and landscape	ServiceOS evidence (80), portfolio AI-agent plan (62), Voice AI research (84), Punctual Pros ad plan (64), private-equity landscape (35), Broad Sky firm profile (6), design references (26)	Banker reports, vendor case studies, public comps, sponsor sites	Medium; vendor claims unverified

CAVEATS

- Every revenue, EBITDA, leverage and EV figure for a private company is an outside-in estimate (est.), mostly low confidence. None comes from management, and no material non-public information was used.
- The KPI roadmaps (months 0–36) and OS and agent values are analyst assumptions for discussion, not forecasts or company guidance. Agent values are not de-duplicated against the OS ranges.
- **Fund size conflict.** One brief cites a ~\$137M Fund I closed in December 2024. SEC data show that \$136.95M was raised by BSP-FL LP, the Frontline deal vehicle, while Broad Sky Partners, LP reports \$335M sold (Form D/A, Apr 2025). This memo uses \$335M.²⁸
- No public filing shows the debt of CET, BPI or Fair Harbor, so their leverage is inferred from sector norms. Web-search budgets ran out during several pulls, and paywalled sources (PitchBook, 9fin, Debtwire) were not accessed.
- Vendor performance claims (ServiceTitan, Rilla, XO!, Togal, PermitFlow) are self-reported. The multiple-premium evidence bundles scale and recurring mix with technology. This memo is not investment advice.

²⁸ Broad Sky firm profile and Private-equity landscape: Form D/A, Broad Sky Partners, LP (Apr 2025); Broad Sky, sale of Smith + Howard to TPG.
